Applicant hereby elects **Species IV, i.e., Fig. 8, with traverse** and respectfully submits that all pending claims, i.e., **claims 1-53**, are readable on the elected Species. For instance, claims 1-39, 51, and 52 read on at least the hybrid topology "H2" shown in Fig. 8. Claims 40-50, and 53 read on at least the hybrid topology "H3" also shown in Fig. 8.

Applicant submits that the election requirement is improper at least because the Office Action fails to establish that the alleged species are patentably distinct. "Patentably distinct" means that two or more subjects as disclosed are related . . . and are patentable (novel and unobvious) over each other. MPEP § 802.01. The Office Action merely states that the alleged species are each related to a purportedly different electromagnetically reactive structure. However, the Office Action fails to address why these purportedly different electromagnetically reactive structures are patentably distinct. Applicant respectfully requests the Examiner to withdraw the election requirement.

Applicant reserves the right to prosecute any non-elected subject matter in this application or in a divisional application.

The Examiner is respectfully requested to contact the undersigned by telephone at the below listed telephone number, in order to expedite resolution of any issues and to expedite passage of the present application to issue, if any comments, questions, or suggestions arise in connection with the present application.

No fee is believed to be necessary for submission of this Election of Species. In the event that a fee is required for this submission or to maintain the present application pending, please charge such fee, including extension of time fees, to Deposit Account No. 50-2613.

Respectfully Submitted,

Paul, Hastings, Janofsky & Walker LLP
